SLC-Switch One | SLC-Hub200 | SLC-Motion200 | SLC-Hub203-G | Core200 / Core200-RS

Zhaga Connection Box | SLC-N203-C | SLC-N200 | SLC-Motion203-G | SL-Control 2

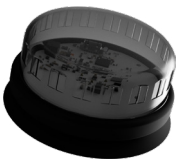

Street Lighting Controller

Intelligent lighting control systems for cities, infrastructure, and buildings.

SLC-Switch One

Compact single-phase switching controller with an integrated smart meter, allowing the display of current, voltage, power, and energy per phase – all despite its compact design.

SLC-Hub200

Cost-optimized version of the Hub 203 with the well-known functions for reliable lighting control.

SLC-Motion200

Our well-known controller with motion control, now in a costoptimized version for efficient lighting control.

SLC-Hub203-G

Controller with automatic GNSS positioning and transmission of the current time to the network.

SLC-Motion203-G

Controller with motion sensor, automatic GNSS positioning, and transmission of the current time to the network.

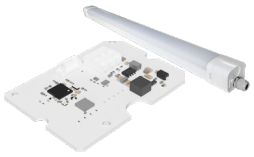

SLC-N203-C

Our controller for NEMA streetlights, which features an integrated cellular connection.

SLC-N200

Seamlessly integrates NEMA luminaires into the esave lighting management system and enables centralised, efficient control.

Core200 / Core200-RS

With an integrated antenna, the luminaire becomes smart without major effort. The fully housing-integrated module also supports combination with PIR or radar sensors.

Connection Box

A box available with one or two Zhaga sockets or a NEMA socket, allowing our controllers to be connected via plug-and-play.

SL-Control 2

New web platform for monitoring and configuring lighting systems, with energy tracking, luminaire data, and many new features.

SLC-RC Switch203-C

Notifications in case of voltage drop via buffer, quick installation thanks to plug-in connections.
